

ABOUT

About Subsentio

Subsentio, Inc. is trusted by both the private and the public sectors to perform lawful intercept. Based in Centennial, Colorado the company has national, regional and rural service provider clients.

Subsentio provides Lawfully Authorized Electronic Surveillance (LAES) and compliance services to a diverse community of communications service providers. From national carriers to ultra-small rural providers, our clients serve millions of subscribers with a wide range of communications services. These services are often complex, multi-vendor environments encompassing differing phases of evolution and technological approaches.

SUBSENTIO,
The **CALEA** Compliance Company

SUBSENTIO HARBOR INTERCEPT

Lawful Intercept with Safe Harbor Certification

HARBOR INTERCEPT employs the Verint's Star-Gate system to provide communications service providers with the technical solutions to comply with the electronic surveillance mandates of CALEA. HARBOR INTERCEPT supports a wide range of call content and call data protocols as well as network types, including circuit switched, packet data, broadband and VoIP. Further, HARBOR INTERCEPT can connect to several switches concurrently and can deliver intercepted communications to multiple destinations simultaneously.

The open-ended, modular design of the Star-Gate platform provides the versatility to easily adapt to new communications technologies and services, such as those based on Packet Data networks, as well as developments in interception standards and methodologies. Designed to manage vast numbers of targets, concurrent sessions and networks, Star-Gate transparently accesses targeted communications without alerting subscribers or disrupting service.

Lawful Intercept with Safe Harbor Certification

- ✓ Multifaceted technology utilizing Verint's Star-Gate solution
- ✓ Supports: UMTS, GSM, CDMA, XDSL CABLE, VoIP, IMS, Broadband and more
- ✓ Provides interoperability with major switch manufacturers to include Alcatel Lucent, Broadsoft, Acme Packet, SONUS, Huawei, Cisco, Lucent, Nortel, Starentetc.
- ✓ Transparent switch access
- ✓ Single point of administration
- ✓ Compliance solution: Technical interface and Safe Harbor Certification

the Communications Assistance for Law Enforcement Act

- This law mandates your compliance
- When you are compliant, you are in "Safe Harbor"
- Subsentio provides end-to-end management of the lawful intercept process
- Partnering with Subsentio indemnifies you against legal problems and civil penalties

Safe Harbor Certification includes:

- Electronic Surveillance manual
- Service provider authorization form
- Exigent request for LAES
- Compliance training
- Network drawings
- Acceptance testing
- System maintenance
- Escalation procedure

"Safe Harbor" indemnifies the provider from non-compliance penalties, and protects customer privacy.

Lawful Intercept with Safe Harbor Certification

The Product

HARBOR INTERCEPT provides communications service providers with a complete and compact solution to Lawful Intercept regulations by meeting the legal obligations of both the access/delivery and administrative functions in a single product. These functions are performed by the following HARBOR INTERCEPT components:

- Mediation Device (MD) – performs the delivery function of the communication surveillance.
- Global System Administration (GSA) – assigns, targets, and oversees system administration.

HARBOR INTERCEPT performs the following tasks:

- Defines target assignments and the destination parameters of LEA's.
- Collects intercepted data from the network.
- Converts messages into the required LI standard format.
- Delivers intercepted communications to the appropriate LEA.
- Controls system security and monitoring system activity.
- Maintains and monitors system operations.
